

How to make ice decorations

You will need:

- Saucers

- Kettle

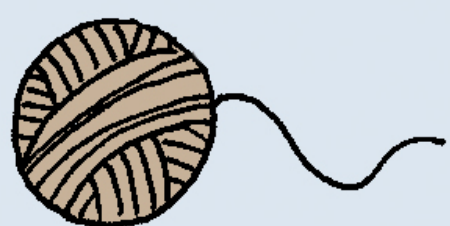

- Boiled water that has been allowed to cool

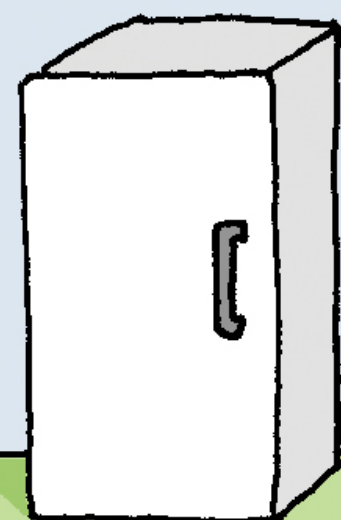

- Natural items like leaves, feathers, berries and grass

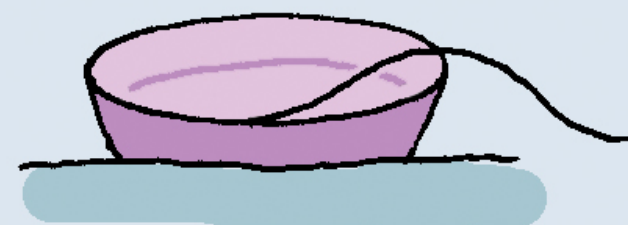

- String or wool

- A freezer (if the weather isn't cold enough!)

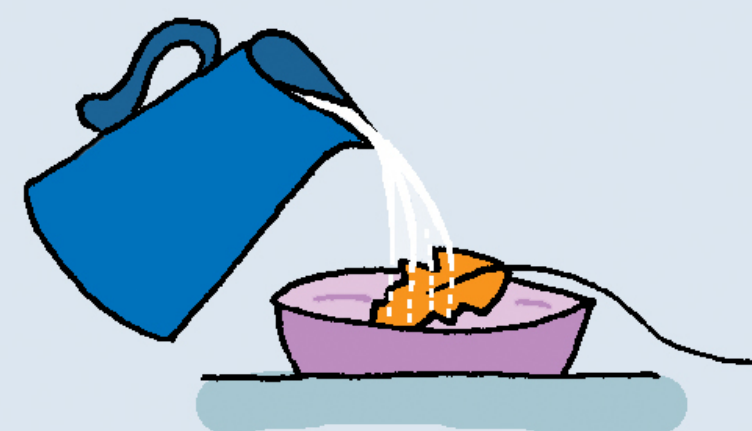

- 1 Place your saucers on a flat surface and put the end of your string into the saucer, making sure a long piece is left dangling over the edge.

- 2 Lay natural items in the saucer over the string.

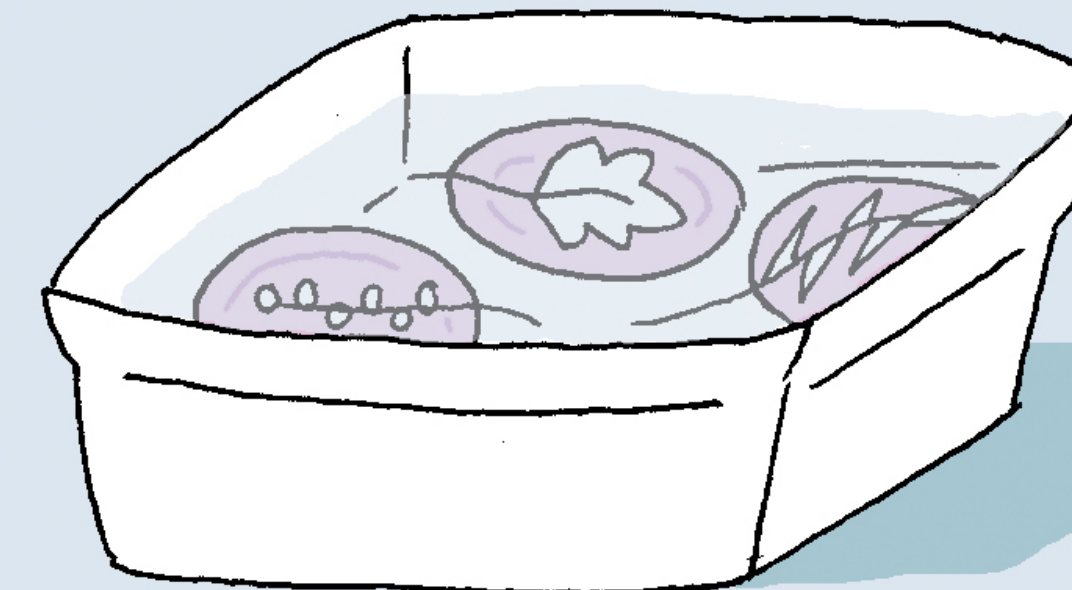

- 3 Gently pour in cooled water (boiling it first helps to remove any bubbles).

- 4 Put the saucers outside on a frosty night (or in the freezer).

- 5 In the morning put the saucers in a tub of cold water to separate the ice.

- 6 Hang them around your garden as decorations.
